

The Specialty Pharmacy Program covers certain drugs commonly referred to as high-cost Specialty Drugs. To receive in-network benefits/coverage for these drugs, these drugs must be dispensed through a select group of contracted specialty pharmacies or your medical provider. Please call the BCBSLA Customer Service number on the back of your member ID card for information about our contracted specialty pharmacies.

All specialty drugs listed below are limited to the retail day supply listed in your benefit plan (typically a 30-day supply). As benefits may vary by group and individual plans, the inclusion of a medication on this list does not imply prescription drug coverage. Please refer to your benefit plan for a complete list of benefits, including specific exclusions, limitations and member cost-sharing amounts you are responsible for such as a deductible, copayment and coinsurance.
